

## WALL STREET.

WEDNESDAY, APRIL 4.

Union Pacific was a decidedly strong feature in an irregular and, for the most part, heavy market. Operators who have been closely observing the course of this stock lately think that they have discovered signs of important shifting of stock ownership entirely outside of the speculative field. The Harriman interest, it is believed, found it necessary to take over at least two large blocks of the stock that have been held for investment for a long time, but owners of which were not in accord with the Harriman management. The outcome of the annual election of directors of the Southern Pacific Company to-day indicated that E. H. Harriman is becoming more and more absolute as the dictator of the Union Pacific-Southern Pacific system. Harriman men were elected to the Southern Pacific Board to-day to take the places of George J. Gould, Jacob H. Schiff, Otto H. Kahn, James S. Speyer, Winslow S. Pierce, C. H. Tweed and James H. Hyde. This means the complete elimination of the Gould and Speyer interest from Union Pacific control. The retirement of Jacob H. Schiff and Otto Kahn was paramount to the new policy of Kahn, Loeb & Co. not to be represented in any railroad directorates.

The New York capitalists who own Chicago Union Traction securities are not discontent over the result of yesterday's election in Chicago. They regard the defeat of the proposition to have the city operate its street railroad as practically nullifying the municipal ownership clause. Under recent United States Supreme Court decisions the properties must remain in the control of the present interest until purchased by the city. The New York representatives of the Chicago Union Traction properties are advised by counsel that the Supreme Court decision also practically nullifies the Muller law under which it is proposed that Chicago shall issue \$2,000,000 of city bonds to purchase the street railroad. The city is expected to give the present Chicago Union Traction interest a vote of confidence in the municipal election. In the meantime these interests will continue to operate the street railroad in the city. The city is expected to give the present Chicago Union Traction interest a vote of confidence in the municipal election. In the meantime these interests will continue to operate the street railroad in the city.

brokers and there was a very evident disposition on their part to take all the stock offered. The offerings, however, were limited to scattering lots of small quantities.

The professional element has been figuring on the speculative possibilities of the new Colorado Fuel and Iron series with a really somewhat disappointing. The "rights" do not hold out as tempting inducements as was expected. For instance, the new bonds are figured at about 75 and the new stock at 75-84 for Colorado Fuel and Iron bonds and 64 for the stock, the new securities do not glitter. The old stock developed weakness to-day on quite heavy transactions.

Pennsylvania's phenomenal earnings are again attracting attention and furnishing the basis for some interesting calculations. This great railroad system reports an increase in gross for February of \$2,216,200 and an increase of net for the same month of \$1,130,000. The January increase was \$2,720,000 gross and \$1,434,000 net. The Pennsylvania lines east of Pittsburgh alone report for the first two months of this year \$3,000,000 increase in gross earnings. If this rate of increase is kept up throughout the year there will be a \$30,000,000 increase in gross with total gross earnings for the two months of \$10,000,000. This is stupendous business and it more than justifies the great interest in the Pennsylvania system. The Pennsylvania system is in a state of transition. It is being able to handle the business that is coming in on it. Other railroads are suffering severely because of a lack of the Pennsylvania brand of far-sightedness.

## COTTON PRICES STEADY WITH TRADING EASY.

Cotton prices were slightly lower than expected to-day and prices here moved steadily at an advance of 1 point to a decline of 2, the weakness being in the near crop positions and due to a good weather map. There was no conspicuous trading either way, but a widening tendency between May and July again attracted attention.

On the cotton futures market, April, none; May, 10.02 to 10.03; June, none; July, 10.05 to 10.06; August, 10.07 to 10.08; September, 10.09 to 10.10; October, 10.11 to 10.12; November, 10.13 to 10.14; December, 10.15 to 10.16; January, 10.17 to 10.18; February, 10.19 to 10.20.
